

Replication Guide

The Impact of U.S.-China Tensions on U.S. Science: Evidence from the NIH Investigations¹

Ruixue Jia (UCSD) Margaret E. Roberts (UCSD) Ye Wang (UNC) Eddie Yang (UCSD)

Computational platform:

1. Results in the paper are generated from the replication folder using MacOS Ventura on a Mac Studio (2022).
2. The R version is 4.2.1 (2022-06-23)

Installing packages:

1. Results are generated using the following R packages from CRAN: broom (1.0.1), dplyr (1.1.3), ebal (0.1-8), fixest (0.11.0), ggplot2 (3.4.2), ggrepel (0.9.1), gridExtra (2.3), here (1.0.1), kableExtra (1.3.4), knitr (1.40), readr (2.1.4), tidyr (1.2.1)

Files & Folders:

11_analysis.R	R code to replicate results in the paper
12_appendix.R	R code to replicate results in the supplementary materials
data	data to replicate results in the paper
output	folder where plots are stored

Acknowledgement:

This paper was written using data obtained in October 2022, from the API for Digital Science's Dimensions platform, available at <https://app.dimensions.ai>.
